DETAILED ACTION

Allowable Subject Matter

1. Claims 1 and 2-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 5,977,779 to Bradley in view of U. S. Patent No. 5,408,690 to Ishikawa et al. are references closest to the claimed invention. Bradley in combination with Ishikawa et al. disclose a method of using a vector network analyzer (VNA) for coordinated Voltage Standing-Wave Ratio (VSWR) and Time Domain Reflectometry (TDR) measurement, said method comprising configuring said VNA for identifying discontinuities correlated to a VSWR lobe. However, Bradley in combination with Ishikawa et al. do not teach identifying a largest VSWR lobe in the frequency band of interest; using phase data associated with S_{11} scattering parameter to find the correct electrical delay required to align Low Pass Step Transform data; and configuring said Low Pass Step Transform span and center time to align coherent inductive and capacitive discontinuities relative to grid lines of a TDR display; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
